To Whom It May Concern:

The NAB's attempt to limit the local programming offered by XM radio (petition 04-160) runs contrary to the precepts of a free, open, and competitive marketplace. I decided to pay for the service because I like the variety and scope of programming available, and would like to see it expand into offering local programming in the Nashville area. 85% of the local broadcasters are of very low quality in my opinion, and are right to be bothered by the success of satellite radio. But the actions they should be taking are to improve their services, not stifling competition.

Thank You
John Callis
